DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 6/20/00 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 15-55 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

With respect to independent claims 15, 23, 31, 39 and 47-55 recite "-- maintaining said network objects in a cache memory in a network cache --". According to this description, a corresponding structure of figure has drawn on page 4. Accordingly, such description is not described in either specification or any of the drawings.

The remaining claims are rejected for incorporating the errors of their respective base claims by dependency.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2771

5. Claims 15-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to independent claim 15, recites "-- maintaining said network objects in a cache memory in a network cache, said cache memory including mass storage; wherein said step of maintaining substantially minimizes a time required for said network cache to retrieve a network object from said cache memory". According to this description, a corresponding figure has drawn on page 4. Since the network object in the cache memory and the cache memory in the network cache, how is the time required for retrieving a network object from said cache memory able to be minimized?

The remaining independent claims are rejected for the similar reason as independent claim 15. Thus, all dependent claims are rejected for incorporating their respective base claims by dependency.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2771

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
